LEGALIZATION PASSED
During the 2014 Minnesota legislative session created a new process allowing seriously ill Minnesotans to use medical cannabis to treat certain conditions. Currently, the Minnesota Department of Health is in the process of adding intractable pain as a qualifying condition for Minnesota’s medical cannabis program, with implementation set to begin in 2016.

APRIL 28, 2016
8AM – 5PM
COMMONS HOTEL
615 Washington Ave SE,
Minneapolis, MN 55455
EARLY PRICING *
MD $250
Other Health Professionals $175
Students and Trainees $100

Learning objectives for this workshop:

- Describe the science underlying medical cannabis and the endocannabinoid system.
- Identify the clinical applications of medical cannabis with various patient populations including those with intractable pain.
- Identify health care provider roles and responsibilities under MN Statute.
- Describe barriers to the use of medical cannabis including myths, attitudes and fear of behavioral and psychological effects.
